

Hey there!

Just wanted to make a couple of notes that I feel are important:

-The XD file has some toggleable layers that the pngs of the wireframes don't show. They're on the gallery pages, under "Lightboxes"

-The "..." on Red isn't a placeholder, but rather a reference since the character only communicates through nods and expressions, and this is expressed as "..." in text form in the games, such as Pokemon Gold, Silver, Crystal, Pokemon Masters EX, etc.

Just wanted to make mention of these!

Thank you!

Sincerely,

Dan
